Scan the QR code to
add calendar event

Discussion

1. Home page is clear and attractive to interact
2. Interaction section is in the bottom of the screen so it's easy to reach
3. The system is compatible, people can complete the whole process on one device
4. Enough power battery
5. Have the function of adding calendar event make sure people won't forget it
6. Home page data updates in real-time

1. No current week volunteers information
2. Is the flat base stable in windy days
3. No shade for the system, the touch screen will not work properly in rainy days
4. People can not see their profile after scanning barcode
